

PAYMENT PLANS IN 60 MINUTES

Reviva has partnered with Northland Credit Corporation to finance engine purchases and install expenses. Northland Credit customizes financing packages to meet the end buyer's needs. Northland Credit has been a top-performing equipment lender in the US for the past 50 years.

HERE'S HOW THE PROGRAM WORKS:

Share this financing option with your customers as a tool for increased engine and install sales in their own business.

Your customer can introduce the Northland Credit option to their customer who is needing a Reviva engine installed into their vehicle or equipment.

Financing is between the engine buyer and Northland Credit. All communication and documents are confidential between these two parties.

The end-buyer contacts Northland Credit direct to discuss financing needs and provides the requested information.

Within 60-minutes Northland Credit will provide a financing program and next steps to the end-buyer.

The end-buyer commits to purchasing the engine.

When approved, Northland Credit will fund the service provider/installer directly for all installation and engine expenses, per the terms of the funding agreement.

Reviva does not receive any compensation for any financial agreements.
